

Constanza Inez C. de Dios, Ph.D.

Houston TX, 77027, USA

Mobile: (925) 206-5763 | tanya.dedios@gmail.com

Summary

Biostatistician with background in biobehavioral research. Proficient in applied data analysis in clinical research using both frequentist and Bayesian statistical inference. Enthusiastic project collaborator dedicated to systematic problem solving.

Highlights

- Data science approaches to analyzing physiological, behavioral, and genomic data
- Clinical trial and experimental research design
- Data reduction and wrangling
- Fluent in R
- Basic proficiency in Python and SAS
- Effective instructor and speaker

Experience

Instructor (Non-Tenure Research)

Center for Neurobehavioral Research on Addiction

Department of Psychiatry and Behavioral Sciences

April 2023—Current

UTHealth Houston

Houston, Texas, USA

- Analyze psychiatric, physiological, EHR, genomic, and biomarker clinical data via generalized linear models, multilevel modeling, multivariate statistics, latent variable models, and statistical learning.
 - Contexts: randomized controlled trials, observational studies, longitudinal designs, service delivery, quality improvement.
 - Content areas: substance use, mood disorders, stem cell therapies, neurology, emergency medicine.
- Apply alternative statistical tools to non-experimental data such as generalized additive models, meta-analyses, and latent variable mixture models.
- Apply frequentist or Bayesian inference as appropriate.
- Evaluate safety and efficacy of therapeutics in psychiatry and respiratory disease.
- Identify most important predictors of substance misuse and treatment outcomes through machine learning.
- Co-investigator on grants funded by federal and state agencies.
- Write statistical analysis plans and generate clinical study reports.
- Process and analyze cumulative total 7.3GB (460k observations, 8k variables) across projects.

Graduate Researcher and Instructor

Cognitive Electrophysiology and Clinical Neuroscience Lab

Department of Psychology

September 2013—August 2019

University of South Florida

Tampa, Florida, USA

- Applied electrophysiological methods in studying reward salience and visual attention.
- Signal-processed a cumulative 120GB of EEG sensor data from 300 human participants over five separate experiments.
- Analyzed sensor data using principal components analyses and repeated-measures analyses of variance (resulted in 9 poster presentations).
- Supervised 8 students in signal-processing 56GB electrophysiological data.
- Crafted and delivered in-person course lectures and learning assessments for 45 students every semester as lab instructor and instructor of record.

Education and Training

Postdoctoral Fellowship

Applied Biostatistics in Behavioral Science, UTHealth Houston

September 2019—March 2023

Houston, Texas, USA

Doctor of Philosophy

Psychology, University of South Florida

September 2013—August 2019

Tampa, Florida, USA

Bachelor of Science

Psychology, St. Mary's College of California

September 2008—May 2012

Moraga, California, USA
